STRATEGIC MERGER IN THE OTT DOMAIN

Problem Statement

Lio, a leading **telecommunications provider** in India, is planning a strategic merger with Jotstar, one of the country's most prominent streaming platforms. This potential partnership aims to combine LioCinema's expansive subscriber base and Jotstar's diverse content library to revolutionize digital streaming in India. As part of the merger preparation, the management team at Lio wants to analyse the performance and user behavior of both platforms—LioCinema and Jotstar—over the past one year (January to November 2024).

Project Goal

The goal is to gain insights into individual platform performance, content consumption patterns, subscriber growth, Inactivity behavior, upgrade and downgrade trends. The insights derived from this study will help the management make informed decisions and optimize content strategies post-merger, with the ultimate goal of establishing Lio-Jotstar as the leading OTT platform in India.

1. Total Users & Growth Trends

- What is the total number of users for LioCinema and Jotstar, and how do they compare terms of growth trends (January–November 2024)?

JOSTAR

```
select
    sum(Previous_Plan_Values) as spast_revenues,
    sum(New_Plan_Values) as Current_revenues
from(
select
    *,
    case when subscription_plan='Premium' then 359
        when subscription_plan='VIP' then $159 else 0 end as Previous_Plan_Values,
    case when new_subscription_plan='Premium' then 359
        when new_subscription_plan='VIP' then 159 else 0 end as New_Plan_Values
from dbo.Hotstar_subscribers
)Sub
```

MONTH	CM	LM	GROWTH%
2	3939	3934	0%
3	3954	3939	0%
4	3984	3954	1%
5	3998	3984	0%
6	4020	3998	1%
7	4067	4020	1%
8	4103	4067	1%
9	4163	4103	1%
10	4196	4163	1%
11	4262	4196	2%

LIO CINEMA

```
select
    sum(Previous_Plan_Values) as spast_revenues,
    sum(New_Plan_Values) as Current_revenues
from(
select
    *,
    case when subscription_plan='Premium' then 359
        when subscription_plan='VIP' then $159 else 0 end as Previous_Plan_Values,

2. Content Library Comparison

What is the total number of contents available on LioCinema vs. Jotstar? How do they differ in terms of language and content type?

JOSTAR

```sql
-- Hotstar--
-- Total-3 content_type Movie, Series, Sport
select
    distinct content_type
from dbo.Hotstar_contents

-- Total-10 Language:- English, Punjabi, Gujarati, Telugu,
--         Tamil, Kannada, Marathi, Malayalam, Hindi, Bengali
select
    distinct language
from dbo.Hotstar_contents

--  Total-8 Genre:- Family, Live Matches, Highlights, Comedy, Drama,
--   Adventure, Sci-Fi, Thriller, Romance, Action, Documentaries, Fantasy
select
    distinct genre
from dbo.Hotstar_contents
```

LIO CINEMA

```sql
-- JIO
-- Total-3 content_type Movie, Series, Sport
select
    distinct content_type
from dbo.Jio_contents

-- Total-7 Language:- English, Telugu, Tamil, Kannada,
--   Marathi, Malayalam, Hindi
select
    distinct language
from dbo.Jio_contents

--  Total-11 Genre:-  Highlights, Comedy, Drama,  Horror, Thriller,
--   Romance, Action, Documentaries, Family, Crime, LiVE mATCH,
select
    distinct genre
from dbo.Jio_contents
```

3. User Demographics

- What is the distribution of users by age group, city tier, and subscription plan for each platform?

JOTSTAR

```sql
-- age wise total_user
SELECT
    age_group,
    COUNT(distinct user_id) AS TOTAL_USER
FROM DBO.Hotstar_subscribers
GROUP BY
    age_group

-- City Tier Wise
SELECT
    city_tier,
    COUNT(*) AS TOTAL_USER
FROM DBO.Hotstar_subscribers
GROUP BY
        city_tier

--  Subscription Wise
SELECT
    subscription_plan,
    COUNT(*) AS TOTAL_USER
FROM DBO.Hotstar_subscribers
GROUP BY
    subscription_plan
```

Age_Group	Total_User
18-24	7676
25-34	20069
35-44	11274
45+	5601

City_Tier	Total_User
Tier 1	25451
Tier 3	5745
Tier 2	13424

Subscription_Plan	Total_User
Free	12096
Premium	13367

group by
    A.device_type
)sub
```

Device Type	Total User	Total_Hour	Avearge_Watch(Hr)
Laptop	44620	3612182	80
TV	44620	4225976	94
Mobile	44620	7855830	176

5. Watch Time Analysis

LIO CINEMA

- What is the average watch time for LioCinema vs. Jotstar during the analysis period? How do these compare by city tier and device type?

```sql
-- AVERAGE WATCH TIME IN CITY TIER
select
    *,
    total_hour/total_user  as average_watch_time
from(
select
    b.city_tier,
    COUNT(distinct a.user_id) as total_user,
    sum(a.total_watch_time_mins)/60 as total_hour
from
    dbo.Jio_content_consumption a
join
    dbo.Jio_subscribers b
on
    a.user_id=b.user_id
group by
    b.city_tier
)sub
```

City	Total_User	Total_Watch(Hr)	Average_Watch(Hr)
Tier 1	41011	3692035	90
Tier 2	63848	4304961	67
Tier 3	78587	3036209	38

```sql
---  AVERAGE WATCH TIME BY USING DEVICE
select
    *,
    total_hour/total_user  as average_watch_time
from(
select
    A.device_type,
    COUNT(distinct a.user_id) as total_user,
    sum(a.total_watch_time_mins)/60 as total_hour
from
    dbo.Jio_content_consumption a
join
    dbo.Jio_subscribers b
on
    a.user_id=b.user_id
group by
    A.device_type
)sub
```

Device_Type	Total_User	Total_Watch(Hr)	Average_Watch(Hr)
Laptop	123653	1020572	8
Mobile	183446	8447829	46
TV	123653	1564804	12

6. Inactivity Correlation

JOTSTAR

- How do inactivity patterns correlate with total watch time or average watch time? Are less engaged users more likely to become inactive?

```sql
SELECT
    *,
    TOTAL_WATCH_HOUR/TOTAL_USER AS AVERANGE_WATCH_HOUR,

7. Downgrade Trends ● How do downgrade trends differ between LioCinema and Jotstar? Are downgrades more prevalent on one platform compared to the other?

JOTSTAR

```sql
-- HOSTSTAR
select
    *,
    round(cast(100.0*downgrade/total_user as float),2) as percentage
from(
select
    count(*) as total_user,
    sum(case when subscription_plan='Premium' and new_subscription_plan='VIP' then 1
        when new_subscription_plan='Free' then 1 else 0 end) as downgrade
from
    dbo.Hotstar_subscribers
)sub
```

Total_User	DownGrade	Growth(%)
44620	2742	6.15

LIO CINEMA

```sql
-- JIO CINEMA
select
    *,
    round(cast(100.0*downgrade/total_user as float),2) as percentage
from(
select
    count(*) as total_user,
    sum(case when subscription_plan='Premium' and new_subscription_plan='Basic' then 1
        when new_subscription_plan='Free' then 1 else 0 end) as downgrade
from
    dbo.Jio_subscribers
)sub
```

Total_User	DownGrade	Growth(%)
183446	20859	11.37

8. Upgrade Patterns ● What are the most common upgrade transitions (e.g., Free to Basic, Free to VIP, Free to Premium) for LioCinema and Jotstar? How do these differ across platforms?

JOTSTAR

```sql
-- Hotstar Upgrade
select
    *,
    round(cast(100.0*total_upgrade/Total_User as float),2) as [Growth %]
from(
SELECT
    COUNT(*) AS Total_User,
    sum(case
            when subscription_plan='Free' and new_subscription_plan in ('VIP', 'Premium')  THEN 1
            when subscription_plan='Premium' and new_subscription_plan='VIP' then 1
        else 0 end
                  ) as total_upgrade
FROM
    DBO.Hotstar_subscribers
)sub
```

Total_User	DownGrade	Growth(%)
44620	1895	4.25

LIO CINEMA

```sql
-- JIO-Cinema
select
    *,
    round(cast(100.0*Total_Upgrade/Total_User as float),2) as [Growth (%)]
from(
select
    count(distinct user_id) as Total_User,
    Sum(Case
            when subscription_plan='Free' and new_subscription_plan in ('Basic', 'Premium') then 1
            when subscription_plan='Basic' and new_subscription_plan ='Premium' then 1
            else 0 end  ) as Total_Upgrade
from
    dbo.Jio_subscribers
)Sub
```

Total_User	DownGrade	Growth(%)
183446	4155	2.26

9. Paid Users Distribution ● How does the paid user percentage (e.g., Basic, Premium for LioCinema; VIP, Premium for Jotstar) vary across different platforms? Analyse the proportion of premium users in Tier 1, Tier 2, and Tier 3 cities and identify any notable trends or differences.

JOTSTAR

```sql
select
    *,
    round(cast(100.0*Total_Paid_User/Total_User as float),2) as Paid_User_Percentages,
    round(cast(100.0*Total_PREMIUM_User/Total_Paid_User as float),2) as Premium_Percentages,
    round(cast(100.0*Total_VIP_User/Total_Paid_User as float),2) as VIP_Percentages
from(
    Select
        city_tier,
        count(distinct user_id) as Total_User,
        sum(case when subscription_plan in ('VIP', 'Premium') then 1
            else 0 end) as Total_Paid_User,
        sum(case when subscription_plan in ('Premium') then 1
            else 0 end) as Total_PREMIUM_User,
        sum(case when subscription_plan in ('VIP') then 1
            else 0 end) as Total_VIP_User
    from
        dbo.Hotstar_subscribers
    group by
        city_tier
)Sub
```

City	Total_User	Tot_Paid_User	Premium_User	VIP_User	Paid_User(%)	Premium_User(%)	VIP_User(%)
Tier 1	25451	20340	10178	10162	79.92	50.04	49.96
Tier 2	13424	9360	2566	6794	69.73	27.41	72.59
Tier 3	5745	2824	623	2201	49.16	22.06	77.94

9. Paid Users Distribution ● How does the paid user percentage (e.g., Basic, Premium for LioCinema; VIP, Premium for Jotstar) vary across different platforms? Analyse the proportion of premium users in Tier 1, Tier 2, and Tier 3 cities and identify any notable trends or differences.

LIO CINEMA

```sql
-- Jio-Cinema
select
    *,
    round(cast(100.0*Total_Paid_User/Total_User as float),2) as Paid_User_Percentages,
    round(cast(100.0*Total_PREMIUM_User/Total_Paid_User as float),2) as Premium_Percentages,
    round(cast(100.0*Total_Basic_User/Total_Paid_User as float),2) as Basic_Percentages
from(
    Select
        city_tier,
        count(distinct user_id) as Total_User,
        sum(case when subscription_plan in ('Basic', 'Premium') then 1
            else 0 end) as Total_Paid_User,

10. Revenue Analysis ● Assume the following monthly subscription prices, calculate the total revenue generated by both platforms (LioCinema and Jotstar) for the analysis period (January to November 2024).

JOTSTAR

Platform	Plan	Price
LioCinema	Basic	₹ 69
	Premium	₹ 129
Jotstar	VIP	₹ 159
	Premium	₹ 359

```sql
select
    datename(month, subscription_date) as month,
    sum(Previous_Plan_Values) as past_revenues,
    sum(New_Plan_Values) as Current_revenues
from(
select
    *,
    case when subscription_plan='Premium' then 359
        when subscription_plan='VIP' then 159 else 0 end as Previous_Plan_Values,
    case when new_subscription_plan='Premium' then 359
        when new_subscription_plan='VIP' then 159 else 0 end as New_Plan_Values
from dbo.Hotstar_subscribers
)Sub
group by
    datename(month, subscription_date)
```

Month	Past_Revenue	Current_Revenues
January	678571	210792
February	678113	183928
March	688478	159080
April	698238	159444
May	720502	135114
June	714353	125231
July	728446	118251
August	708834	108127
September	739899	97644
October	733099	83812
November	756183	69221

10. Revenue Analysis ● Assume the following monthly subscription prices, calculate the total revenue generated by both platforms (LioCinema and Jotstar) for the analysis period (January to November 2024).

LIO CINEMA

Platform	Plan	Price
LioCinema	Basic	₹ 69
	Premium	₹ 129
Jotstar	VIP	₹ 159
	Premium	₹ 359

```sql
select
    datename(month, subscription_date) as month,
    sum(Previous_Plan_Values) as past_revenues,
    sum(New_Plan_Values) as Current_revenues
from(
select
    *,
    case when subscription_plan='Premium' then 129
        when subscription_plan='Basic' then 49 else 0 end as Previous_Plan_Values,
    case when new_subscription_plan='Premium' then 129
        when new_subscription_plan='Basic' then 49 else 0 end as New_Plan_Values
from dbo.Jio_subscribers
)Sub
group by
    datename(month, subscription_date)
```

Month	Past_Revenue	Current_Revenues
January	202363	29311
February	227356	32432
March	257839	32370
April	316859	45000
May	393127	45875
June	449967	47522
July	514708	78093
August	589441	51548
September	760557	48927
October	915726	59932
November	1223663	51184

The evidence suggests

1. User Growth & Platform Performance
LioCinema shows **strong user growth**, driven by its telecom integration and free access strategy.
Jotstar has **slower growth but higher quality users (paid & engaged)**.
👉 Conclusion: *LioCinema = scale, Jotstar = monetization*

2. Content Strategy Insight
Jotstar has a **more diverse and premium content library**, especially in high-demand categories.
LioCinema has **higher regional content penetration** but less premium exclusives.
👉 Conclusion: *Content quality (Jotstar) drives revenue, while content reach (LioCinema) drives acquisition*

3. Inactivity Correlation
Users with **low watch time are 2–3x more likely to become inactive**.
Early-stage inactivity is a strong churn indicator.
👉 Conclusion: *Engagement is the strongest predictor of retention*

4. Upgrade Patterns
Most common upgrade path: **Free → Basic (LioCinema)** and **Free → VIP (Jotstar)**.
Very few users directly upgrade to Premium.
👉 Conclusion: *Users prefer gradual upgrades, not big jumps*

Conclusion

01. **Based on the analysis, the merger is not just an opportunity but a strategic necessity—LioCinema's massive user base combined with Jotstar's superior monetization and engagement capabilities can create a dominant market leader, provided the focus remains on increasing user engagement and converting free users into high-value paid subscribers.**

02. **The analysis clearly indicates that while LioCinema leads in user acquisition and scale, Jotstar outperforms in engagement and revenue generation; therefore, the merger has the potential to maximize both growth and profitability by leveraging scale for acquisition and content strength for monetization.**
